Three Years In
A Row**

Heat water only when you need it

Rinnai efficiency at a glance

More comfort, more choices, more control

Still have questions?

The Rinnai tankless hot water heater is a state-of-the art, energy-efficient water heating system that uses a gas powered heat exchanger to heat water on demand. Compact in size, our innovative tankless technology heats water only as needed when water flow is detected, resulting in endless hot water. And unlike traditional tank systems, the Rinnai system can deliver hot water to multiple water sources simultaneously at a constant user-set temperature.

Endless hot water supply maintains consistent, safe temperature.

One Rinnai delivers 240 gallons or more per hour with no recovery time.

ESTIMATED ANNUAL ENERGY COST COMPARISON*

Costs less to operate on an annual basis.

Based on 77° Rise, * Based on a 34,000 BTU input. ** Based on 4,500 Watt elements.

Rinnai R94LSi	\$265
Natural Gas 40-Gallon Tank**	\$326
Electric 40-Gallon Tank**	\$453

Interior/Exterior Install Options	✓	Interior Only
Warranty*/Avg. Service Life (Years)	12/20	6/12

*12-year heat exchanger limited warranty, 5 years parts and 1 year labor installed in residential applications; 5 years for heat exchanger in commercial applications.

Interior Mount

Rinnai offers four interior mount models in gas or propane units that deliver maximum flows between 5.0 and 9.8 gallons per minute (GPM). They feature direct energy-saving electronic ignition. No more energy-wasting pilot lights. In addition, interior mount units require no indoor make-up air and vent directly to the outside atmosphere.

Exterior Mount

Rinnai offers four exterior units as well, with maximum outputs from 6.3 to 9.8 GPM. These outdoor models require no additional venting accessories and can be installed on the exterior of your home. And for the ultimate custom look, these units can be installed in a recessed box, flush mounted and painted or textured to match the exterior of your home.

Digital Temperature Controller

Digital Controllers

Rinnai tankless water heaters feature digital controllers that allow the user to select the exact temperature they desire. Using wireless remotes or wall-mounted digital controllers, users can have the flexibility to change the temperature in different locations of their home. Digital control units also display diagnostic codes if the water heater needs maintenance or service.

Digital Controller with Bath-Fill Function

Concentric Vent (One Penetration)	✓	Limited
12-year heat exchanger warranty*	✓	Limited
24/7/365 Technical Support	✓	Limited

Why should I purchase a tankless water heater from Rinnai?

Rinnai Corporation is the world's largest manufacturer of gas appliances. Our tankless water heaters are manufactured to the highest quality standards and subject to rigorous quality testing all backed by an extensive dealer and service network. You don't have to look far to see our tankless water heaters featured in numerous show homes across America, and they were voted #1 in Builder Magazine's most popular product for 2004, 2005 and 2006.

How does the Rinnai tankless water heater work?

The Rinnai tankless hot water system uses a gas-powered heat exchanger to heat water when you need it. Our innovative tankless technology heats water only as needed when water flow is detected, resulting in hot water that is always available.

How will I save money on my energy cost?

Unlike antiquated hot water tanks that heat and reheat the same water 24 hours a day, Rinnai's tankless water-heater technology is more efficient, because it only heats water when it is needed. When a hot water source is opened, Rinnai senses the demand and starts delivering continuous hot water. An electronic ignition system also eliminates the need for a pilot light which wastes un-needed gas.

How safe is the Rinnai tankless design?

Rinnai tankless water heaters can be set to operate at exact user-specified temperatures using a digital controller. Additional controller units can be placed in multiple locations in the home. A significant safety feature in households with small children and elderly individuals. There is no pilot light to worry about accidental ignition of flammable substances, and there's no tank to leak or break causing flooding.

How do I control the Rinnai tankless heater?

Rinnai tankless water heaters feature a user friendly digital controller to set the hot water temperature you desire. The display also allows the unit to be turned on or off and displays diagnostic codes if the water heater needs maintenance or service.

Where can we install the Rinnai tankless heater?

Compact in size, the Rinnai tankless heater can be installed indoors, such as in a laundry room or garage, or outdoors on an exterior wall or in a recessed box.

What is the product warranty?

Our LS Series features a 12-year limited warranty on the heat exchanger, 5-year warranty on parts, 1 year for labor. The heat exchanger warranty for commercial applications is 5 years.

Where do I go to get a Rinnai tankless water heater?

Rinnai tankless water heaters are available through a large network of authorized independent dealers. You can call Rinnai at 1-866-RINNAI-1 or visit www.foreverhotwater.com to locate a dealer near you.

Key Features of the LS Series

- Sleek, modern design
- Commercial-grade heat exchanger for residential and commercial applications
- Increased hot water output
- EZConnect™ (connects two units together)*
- Integrated condensate collector for interior models
- Backed by a 12-year heat exchanger limited warranty, 5 years parts and 1 year labor installed in residential applications; 5 years for heat exchanger in commercial applications.

* Feature not available for the R63LSe.
